

Frequently Asked Questions

Q: Can my pet do his/her business in the wheelchair?

A: Yes, your pet may urinate and defecate while using Walkin' Wheels.

Q: Can my pet use his/her rear legs in the wheelchair?

A: Yes. Unless the rear legs are paralyzed, allowing the dog to use his/her hind legs helps to maintain the musculature. If the rear legs are paralyzed, using the stirrups will keep the dog's legs from dragging on the ground.

Q: How do I know what size Walkin' Wheels my dog needs?

A: Our simple online Walkin' Wheels SureFit™ Calculator determines the right size for you! Just type in your dog's breed, weight, and one or two measurements, and the SureFit™ Calculator will do the rest: www.WalkinPets.com/wwsizing

Q: What is the resale value of Walkin' Wheels?

A: Because a Walkin' Wheels wheelchair is fully adjustable, it can be easily resold or donated to benefit another dog.

BE THE NEXT MIRACLE

TOGETHER WE MOVE PETS

Walkin' Wheels® wheelchairs are *life-changing* tools, enabling pets to go for walks, play fetch, and regain their independence.

Walkin' Wheels wheelchairs provide an extremely simple solution for pets experiencing mobility challenges.

The fully adjustable Walkin' Wheels wheelchair is preferred by veterinary professionals, animal caretakers, and pet parents worldwide.

Walkin' Wheels are ideal for both long-term use to keep dogs active or short-term rehabilitative use.

Walkin' Wheels retail for \$199-\$479.

Veterinarians and other pet care professionals: call to inquire about professional pricing discounts.
